

# Modular Plastic Belts

- Easy installation
- High mechanical strength
- Wear resistant
- No gaps between parallel belts
- Excellent product handling

## 2121 series

Straight running belt with single piece widths

- 1/2 inch pitch
- .34 (11/32) inch belt height

Widths: 3, 3.25, 4.5, 6, 7.5 inches  
Standard length 10ft.  
Pitches: 240

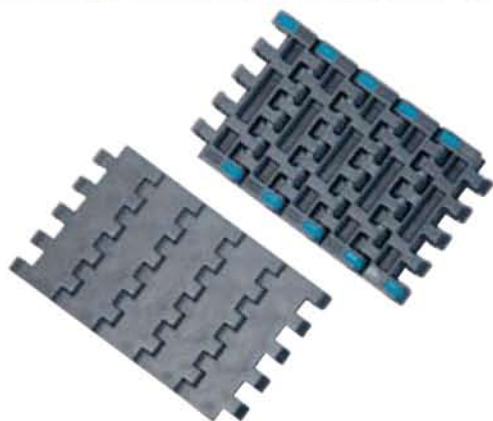

## 2121 FT series

Straight running belt with combined piece widths

- 1/2 inch pitch
- .34 (11/32) inch belt height

Widths: 9 through 120 inches (various)  
Standard length 10ft.  
Pitches: 240

## 2252 series

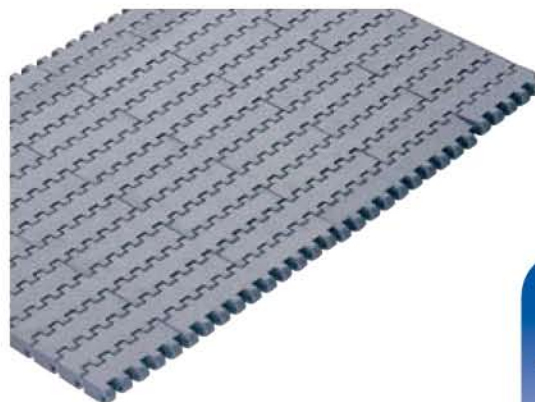

Straight running belt with single piece widths

- 1 inch pitch
- 1/2 inch belt height

Widths: 3, 3.25, 4.5, 6, 7.5 inches

Standard length 10ft.

Pitches: 120

## 2252 FT series

Straight running belt with combined piece widths

- 1 inch pitch
- 1/2 inch belt height

Widths: 9 through 120 inches (various)

Standard length 10ft.

Pitches: 120

A wide variety of sprockets are available for all types of belts.

Chain-Belts solve the problem of how to incorporate side flexing needs into a straight running modular belt application. Uses standard TAB style chain tracks or guides. Chain-Belts are designed to have the same height above the wear surface as modular belts, and a solid surface that makes them suitable for glass bottles and PET bottles, especially those with low contact area bases.

## 2250 TAB Chain-Belts

Side flexing belt with TAB guides

- High strength, heavy duty
- Matching height to 2121 series belts

Widths: 3.3, 4.5 inches

Standard length 10ft.

Pitches: 120

## 2251 TAB Chain-Belts

Side flexing belt with TAB guides

- High strength, heavy duty
- Matching height to 2252 series belts

Widths: 3.3, 4.5 inches

Standard length 10ft.

Pitches: 120

Example: Matching surface

2121 series belt

2250 TAB Chain-Belt
